School of Computer Science and Engineering

AN INTERNSHIP REPORT

ON

WEB DEVELOPER INTERNSHIP

at Codec Technologies

Submitted in partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

Submitted By
PIYUSH DUBEY

Roll Number / Student ID: 25SCS1003004086

Batch: 2025–2029

Internship Period: 01/06/2026 to 01/08/2026

CANDIDATE'S DECLARATION

I, PIYUSH DUBEY, do hereby declare that the internship report titled "Web Developer Internship at Codec Technologies" has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature:-

Student Name: PIYUSH DUBEY

Roll No.: 25SCS1003004086

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank Codec Technologies India, and in particular Dr. Anurag Shrivastava, for providing me the opportunity and the structured platform to learn and gain hands-on exposure in the domain of Web Development. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 2-Month Internship undertaken at Codec Technologies Pvt. Ltd., in the domain of Web Development, as a Web Developer Intern. The internship, approved under AICTE and ICAC guidelines, was carried out from 01/06/2026 to 01/08/2026 in Pan India, Hybrid mode, as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. The primary aim of this internship was to build a strong practical foundation in front-end and back-end web development, and to apply this knowledge to real-world project tasks assigned by the reporting Project Head.

The internship followed a structured, week-wise curriculum combining conceptual learning with hands-on project work, culminating in the successful completion of all assigned tasks. On successful completion of the program, a Certificate of Internship was awarded by Codec Technologies Pvt. Ltd. under the patronage of the AICTE National Internship Portal.

4.2 Organization Profile

Codec Technologies is a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. The organization delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth. Codec Technologies is an ISO 9001:2015 certified organization and a Google for Education partner, and is registered on the AICTE National Internship Portal. It is headquartered at Chandivali IT Hub, Mumbai, and runs structured internship programs across domains such as web development, data science, and business consultancy.

4.3 Problem Statement

Although a large number of engineering students learn the theoretical foundations of web technologies during their academic coursework, very few get structured, hands-on exposure to building complete, deployable web pages and applications using an industry-aligned workflow. Concepts such as responsive design, client-server interaction, and version control are often understood only at a theoretical level, with little practice in building, testing, and delivering an actual project end-to-end. The problem addressed by this internship was to practically learn and apply the web development workflow — from designing a responsive front-end, to adding interactivity with JavaScript, to integrating with back-end data and deploying a finished project.

4.4 Internship Objectives

- To understand and apply the fundamentals of HTML5, CSS3, and responsive web design.
- To build interactive web pages using JavaScript and modern ES6 features.
- To gain hands-on experience with version control using Git and GitHub.
- To understand the basics of client-server communication and working with APIs.
- To design and develop a complete front-end project based on assigned requirements.
- To integrate front-end components with sample back-end/data sources.
- To test, debug, and deploy a functional web project.

4.5 Scope of the Internship

The scope of this internship spans the complete front-end web development workflow — starting from understanding HTML/CSS/JavaScript fundamentals and responsive design, moving to version-controlled collaborative development, and extending into integration with back-end data sources and deployment of a finished project. The internship was carried out in a hybrid mode under the guidance of an assigned Project Head, and was limited to project-based learning tasks provided by Codec Technologies; it did not involve deployment on any live client production system.

4.6 Technologies and Tools Used

- Front-End: HTML5, CSS3, JavaScript (ES6), Bootstrap
- Version Control: Git, GitHub
- Development Environment: Visual Studio Code, Chrome DevTools
- Back-End Concepts: REST APIs, JSON, basic server-side integration
- Design & Testing: Responsive design principles, cross-browser testing

4.7 System Architecture

The general architecture followed during the internship for the web development project can be summarized in the following layers:

- Presentation Layer: HTML and CSS structure the content and visual layout of the web pages, with responsive design ensuring compatibility across devices.
- Interaction Layer: JavaScript handles DOM manipulation, form validation, and dynamic user interactions on the client side.
- Data Layer: Sample data and REST APIs supply content to the front-end, simulating a real back-end integration.
- Version Control Layer: Git and GitHub manage source code versioning, branching, and collaboration with the project team.
- Deployment Layer: The finished project is tested across browsers and prepared for deployment/hand-off.
- Review Layer: Weekly check-ins and a final review with the assigned Project Head track progress and quality.

4.8 Methodology

The internship followed a structured, week-wise methodology combining conceptual learning, hands-on project work, and periodic review, as summarized in the table below.

Week	Module	Description
Week 1	Orientation & Web Fundamentals	Introduction to the organization, project guidelines, and revision of HTML5 and CSS3 fundamentals including semantic markup and the box model.
Week 2	Responsive Web Design	Building responsive, mobile-first layouts using Flexbox and CSS Grid; introduction to Bootstrap for rapid UI development.
Week 3	JavaScript Essentials	Core JavaScript concepts — DOM manipulation, events, functions, and ES6 features — applied to add interactivity to web pages.
Week 4	Front-End Project Work	Designing and coding the front-end of an assigned mini-project (landing page / portfolio-style site) based on client-style requirements.
Week 5	Version Control & Collaboration	Using Git and GitHub for version control, branching, and collaborative code management; code review practices.
Week 6	Back-End Basics	Introduction to server-side concepts, working with APIs, and connecting front-end pages to sample data sources.
Week 7	Integration & Testing	Integrating front-end and back-end components, cross-browser testing, and fixing responsiveness and performance issues.
Week 8	Final Project Submission & Review	Final deployment of the project, documentation of the work done, and presentation/review with the assigned Project Head.

Note: This was an unpaid internship; a nominal certificate/processing fee was applicable as per the program terms.

Progress was tracked through weekly check-ins with the assigned Project Head, and the overall completion was evaluated based on performance across all assigned tasks and the final project review.

4.9 Expected Outcomes

- Ability to build responsive, well-structured web pages using HTML5 and CSS3.
- Practical understanding of JavaScript for adding interactivity to web pages.
- Hands-on experience with Git/GitHub for version control and collaboration.
- Working knowledge of integrating front-end pages with APIs/back-end data.
- A completed front-end project, tested and reviewed by the assigned Project Head.
- Successful completion of the 2-Month Internship with a Certificate of Internship issued by Codec Technologies.

4.10 Certificates of Completion and Communication Proof

The Internship Offer Letter and the Internship Completion Certificate issued by Codec Technologies, confirming the 2-Month internship as Web Developer Intern, are attached below along with the communication and course-completion proof for the internship program.

INTERNSHIP OFFER LETTER

Dear Piyush dubey,

We are pleased to offer you a 2 Month Internship as Project Intern at Codec Technologies, a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth.

Internship Details:

- Designation : Web Developer Intern
- Location & Mode: Pan India, Hybrid
- Duration : 01/06/2026 to 01/08/2026
- Reporting to : Assigned Project Head(s)

This program provides an immersive experience, enabling you to gain industry-level knowledge and acquire valuable skills. Exceptional interns may also qualify for a scholarship award based on weekly performance reviews conducted by project supervisor.

If you accept this offer and the terms above, please complete your assigned projects and training tasks on our platform and via email.

Best regards,

Sincerely,
Dr. Anurag Shrivastava,
Codec Technologies India
NCS ID: E19E86-0116588288923
Date Of Issue - 01/06/2026

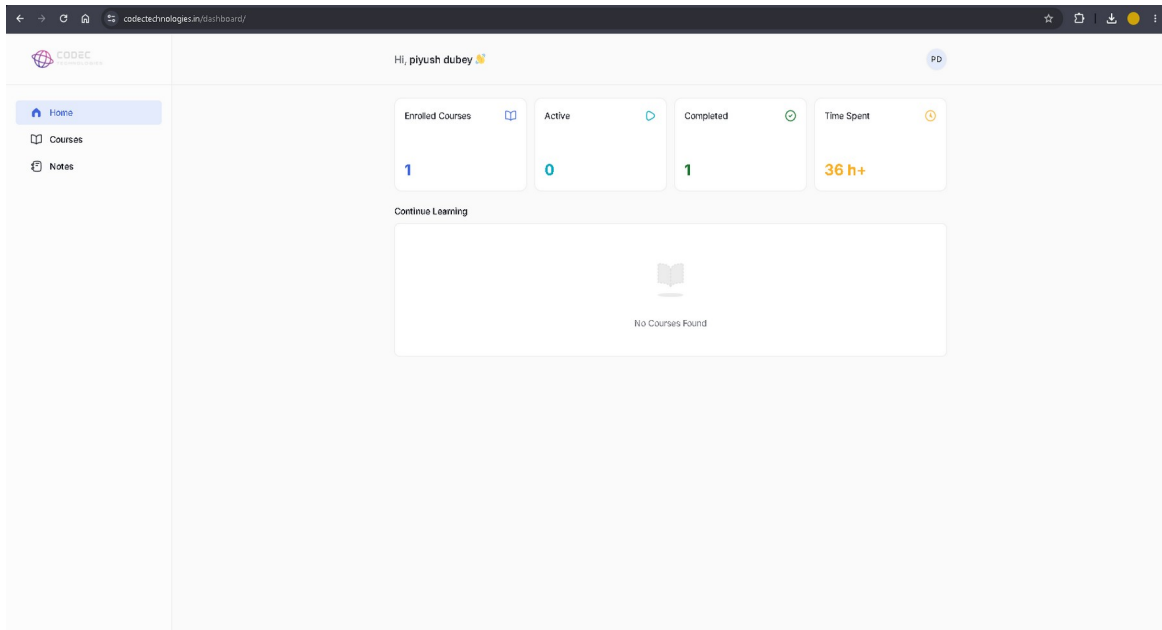

Dr. Anurag Shrivastava
Talent Acquisition Manager
